2. Description of the Service

2.1 Overview

Time Tracker is an AI-powered time tracking solution that integrates with Atlassian Jira. The Service:

- Captures periodic screenshots of a User's active screen during tracking sessions
- Uses AI to analyze screenshots and match activities to Jira issues
- Extracts text from screenshots using local OCR with automated privacy filtering
- Creates, updates, and manages worklogs in Jira
- Provides time tracking reports, dashboards, and analytics within Jira
- Classifies applications as productive, non-productive, or private

2.2 Service Components

The Service consists of two required components:

1. **Forge App (Jira Plugin)** — Installed from the Atlassian Marketplace into your Jira Cloud instance. Provides analytics dashboards, settings management, and worklog synchronization within Jira.
2. **Desktop App (Companion Application)** — A separately distributed desktop application that must be installed on each User's computer. Performs screen capture, activity monitoring, OCR processing, and uploads data to the Service. **The Desktop App is required for time tracking functionality and is not distributed through the Atlassian Marketplace.**

2.3 What the Service Does NOT Do

- The Service does **not** record keystrokes, clipboard content, webcam feeds, or microphone input
- The Service does **not** operate in stealth or hidden mode — Users are always aware when tracking is active
- The Service does **not** capture screenshots when a User has paused or stopped tracking, or during idle periods

3. Eligibility

You must be at least 16 years of age to use the Service. By using the Service, you represent and warrant that you meet this age requirement and have the legal authority to enter into these Terms on behalf of yourself or your Organization.

The Service is intended for use in a professional workplace context. It is not designed for personal or consumer use.

4. Account Terms

4.1 Authentication

- You are responsible for all activities that occur under your account
- You must notify your Organization administrator and Amzur immediately of any unauthorized access to the Service

5.1 Subscription

Access to the Service requires a paid subscription through the Atlassian Marketplace. Subscription terms, pricing, and billing are governed by the Atlassian Marketplace terms and your Organization's subscription agreement.

5.2 Payment

All payments are processed through the Atlassian Marketplace. Amzur does not directly process payment information. For billing inquiries, refer to your Atlassian Marketplace account or contact Atlassian support.

5.3 Refunds

Refund policies are governed by the [Atlassian Marketplace Terms of Use](#).

6. Organization Responsibilities

IMPORTANT — For Organizations Deploying the Service:

The Service captures screenshots and monitors application usage on employee and contractor devices. Organizations are solely responsible for ensuring that their use of the Service complies with all applicable laws, including employment, labor, and data protection laws in the jurisdictions where their Users are located.

6.1 Employee Notice and Consent

Before enabling the Service for any User, the Organization must:

- Provide **clear, written notice** to each User explaining what data the Service collects, how it is used, and who has access
- Obtain any consents required by applicable law before monitoring begins

- Inform Users of their right to pause or stop tracking at any time
- Ensure Users understand that screenshots may incidentally capture personal content visible on screen

6.2 Labor Law Compliance

Employee monitoring laws vary significantly by jurisdiction. The Organization is responsible for:

- Complying with local labor and employment laws regarding workplace monitoring
- Consulting with works councils or employee representatives where required (particularly in the EU)
- Conducting Data Protection Impact Assessments (DPIAs) where required by GDPR or equivalent laws
- Ensuring the scope of monitoring is proportionate to the stated business purpose
- **The Service must not be used to monitor employees or contractors without their knowledge where prohibited by applicable law**

6.3 Appropriate Use of Data

- Time tracking data and AI-generated insights should **not** be used as the sole basis for adverse employment decisions (such as termination, demotion, or disciplinary action) without appropriate human review
- The Organization is responsible for establishing internal policies governing how time tracking data may be used within the organization
- The Organization must designate which individuals have access to User data through the administrator settings

7. User Consent and Tracking Controls

7.1 Explicit Consent Required

- The Desktop App requires **explicit consent** from each User before any screenshot capture or activity monitoring begins
- No data is collected until the User actively starts a tracking session
- Consent can be withdrawn at any time by stopping tracking through the Desktop App

7.2 User Controls

Users have the following controls at all times:

- **Start / Pause / Stop:** Full control over when tracking is active via the system tray
- **Visibility:** A system tray indicator is always visible when tracking is active

- Your data is **not** used to train or fine-tune AI models by Amzur or our AI providers
- AI processing is performed in real time; inputs are discarded after analysis is complete

9.3 No Automated Decision-Making

The Service does not make automated decisions that produce legal or similarly significant effects on Users. All AI outputs are advisory and require human review. Organizations must ensure that AI-generated insights are not used to make solely automated employment decisions without human oversight.
